EDUCATION

Master's in Computer Application, Graphic Era University, Dehradun. 2025 - 2027

Coursework: Operating System, Data Structures and Algorithms, Full Stack Web Development.

Bachelor's in Computer Application, Graphic Era Hill University, Bhimtal. 2021 - 2024

Coursework: C and C++ Programming, Agile Software Development, Database Management System.

EXPERIENCE

Software Engineer Intern at Unite Wings Educational Confederation May 2025 - November, 2025

- Developed and deployed an automated certificate verification RESTful API using FastAPI (Python) on Vercel reducing hours of manual verification effort by implementing a Cross-Repository GitHub Workflow to automate data synchronization between private and public repositories. [Verify Certificate](#).
- Built and deployed the Unite Wings official website using Next.js, hosted on Vercel with a custom domain (unitewings.com), after configuring Hostinger DNS to Vercel Nameservers.

OPEN SOURCE CONTRIBUTION

MasterPortfolio Dec 2025 - Jan 2026

- Implemented a responsive PDF rendering page with React-PDF for direct viewing and downloading resume and also fixed the responsiveness of navbar and experience cards. [View all PRs](#).

CosmoPortfolio Jan 2026

- Fixed responsiveness of the navbar and other components. Optimized SEO, laggy UI and slow response by implementing lazy loading, conditional rendering, and splitting the site into multiple pages. [View all PRs](#).

PROJECTS

SRON (Saksham Rapid Object Notation) Sept 2023 - Mar 2026

- Developed a high-performance, **cross-platform programming language from scratch** which provides 90+ built-in functions, 101 keywords and 9 data types achieving extremely fast runtime speed.
- Engineered compiler and interpreter from scratch using C++ (GCC & Clang) providing features like automatic garbage collection, file manipulation, cross-platform binary bytecode, low memory usage and much more.
- Released 6 stable versions (latest: v2.3, Jan 2026) with cross-platform compatibility for Windows and Linux, ensuring 100% consistent behavior across operating systems.
- Developed a Vscode extension and wrote extensive technical documentation with 100+ sample programs and tutorials, making the language easy to use for developers of all skill levels.
